JIRA

Dedicated and hard-working self-learner with a bachelor's degree in Computer Science from the University of Texas. Created a 98% bug-free product during mockup and wireframe translation into JavaScript code. Former president of the G33K student organization, now volunteering as a teacher to kids aged 10–18, explaining basic and advanced computer programming concepts.

Experience

2018-08

- 2021-09

Web Developer

Star Technologies, Austin, TX

- Developed mockups and wireframes for 5 landing pages.
- Built documentation for the newcomers to teach standards and best practices in JavaScript.
- Designed and delivered 3 web applications using JavaScript frameworks, increasing user engagement by 9%.
- Delivered a seamless and unique user experience across all devices via accessible and responsive user interfaces.

Key achievement: Converted design mockups and wireframes into JavaScript code to deliver a bug-free product in 98%.

Volunteering

2016-06

- present

"Happiness" Local Community Center, Austin, TX

- Teaching kids aged 10–18 how to create websites and overall computer programming from basic to advanced concepts.
